

Property Improvement Program (P.I.P.)

Inspection Fee: \$175.00 (Subject To Change)

A Property Improvement Program is required for property owners in Wood County with sewage treatment systems (STS) as changes are made to their properties. As part of this program, the STS on the property will be enrolled in the Wood County STS Operation & Maintenance Program (O&M). Once issued, the O&M permit is valid for a period of up to 5 years and must be renewed at that time.

Project Improvement Description	
Include Dimensions of Addition and/or Outbuilding **Attach a copy of the site plan or use the space provided on the back side of this form	
Plumbing work being completed: <input type="checkbox"/> No <input type="checkbox"/> Yes (if yes please describe below) Describe:	
Wood County Building Department and/or Township Zoning have been made aware of this project: <input type="checkbox"/> Yes <input type="checkbox"/> No	

I certify that, to the best of my knowledge, the information submitted with this application is correct and I agree to any necessary repairs to properly maintain the STS as per OAC 3701-29 and PWS as per OAC 3107-28. I understand that once the STS on my property meets current code, an O&M Permit will be issued to ensure the proper maintenance of the system will be completed. I agree to allow a representative of the Wood County Health Department to conduct an inspection of the STS and PWS to ensure compliance with OAC 3701-29 and 3701-28 prior to issuance of PIP Approval.

Process to Obtain Approval for Property Improvements:

- 1) Complete this application and submit it to the WCHD along with the appropriate fee.
- 2) Along with the application, provide the health department with a site plan outlining the exact location and dimensions of the proposed new construction as well as the proximity to your well and/or septic system. (Space has been provided on the back of this application for your convenience.)
- 3) Contact WCHD to schedule an appointment with the inspector to evaluate your proposed site plan.
 - a. **The location of the septic tank and distribution box must be accessible and exposed prior to the site inspection.** This department may have a record of your septic system on file to assist you.
 - b. The location of the well must be confirmed.
 - c. If this department does **not** have a record of your existing HSTS and/or PWS, you will be required to locate and expose these items **prior to** the inspection. Required upgrades will be mandated if missing components (ex. septic riser(s), baffle(s), damaged/missing distribution box etc.) or wells that are in violation of current code requirements (ex. too close to septic system, buried, located in a pit) are determined to exist during the time of the site inspection.
- 4) As a condition of this approval, the property will be placed in the HSTS O&M Program
