POSITION OVERVIEW

Working in a collaborative team environment, the Psychiatric Nurse Practitioner (PMHNP) is responsible for providing mental health services for children and adults.

ESSENTIAL DUTIES

- Perform psychiatric evaluation, diagnosis, and medication management for patients presenting with mental health and/or substance use needs.
- Collaborate with a multidisciplinary team including behavioral health counselors, primary care medical and dental providers, pharmacy personnel, and support staff to facilitate patient care coordination and appropriate use of warm hand-offs and internal referrals.
- Analyze and evaluate patient data and examination findings to diagnose the nature and extent of mental disorders.
- Design individualized care plans using a variety of treatments.
- Maintain accurate documentation in compliance with health center and regulatory standards, and effectively utilize the EHR for documentation of all patient care.
- Monitor clinical outcomes both individually and for patient panels to improve mental health.
- Educate patients on disease prevention, management, and healthy lifestyle habits.
- Refill medications as appropriate.
- Counsel patients regarding health plans and assessments.
- Respond to patient inquiries and requests in a timely manner, following the health center's standards.

- Available to the health center's medical, dental, and behavioral health providers for consultation, including interdisciplinary case reviews without direct patient contact.
- Establish and maintain relationships with other agencies.
- Participate in peer reviews, program evaluation, and quality improvement activities.
- Submit appropriate charting and billing in a timely manner, following the health center's standards and relevant contract and regulatory requirements.
- Support after-hours phone coverage as scheduled.
